

WILLIAM G. HAMILTON, MD

2501 Parkers Ln
Alexandria, VA 22306
703-892-6500
703-799-5989 fax

TITLE

Staff Member, Anderson Orthopaedic Clinic
Clinical Instructor, Adult Reconstruction Fellowship, Anderson Orthopaedic Research
Institute

EDUCATION

Brown University
ScB Psychology, 1992

University of Cincinnati College of Medicine, MD, 1997
Honor: Alpha Omega Alpha, 1997

RESIDENCY

Hospital of the University of Pennsylvania, Philadelphia, PA
Internship, General Surgery, 1997-1998
Orthopaedic Surgery, 1998-2002

FELLOWSHIP

Anderson Orthopaedic Adult Reconstruction Fellowship
Alexandria, VA, August, 2003

Insall Knee Society Traveling Fellowship
October, 2009

SPECIAL INTERESTS

Anterior Supine Muscle Sparing Total Hip Arthroplasty
Primary & Revision Hip & Knee Arthroplasty
Tissue Sparing Hip & Knee Arthroplasty
Unicondylar Knee Arthroplasty
Computer Assisted Total Joint Arthroplasty

HOSPITAL PRIVILEGES

INOVA Mount Vernon Hospital

INOVA Fairfax hospital
INOVA Alexandria Hospital

LEADERSHIP POSITIONS

Chairman, Department of Orthopaedic Surgery, INOVA Mount Vernon Hospital
2008-present

President, Washington D.C. Orthopaedic Society
2006-2007

Administrative Chief Resident, 2001-2002
Department of Orthopaedic Surgery, University of Pennsylvania

MEMBERSHIP

American Association of Orthopaedic Surgeons- Fellow
American Association of Hip & Knee Surgeons- Fellow
American Medical Association
Alpha Omega Alpha Society
Virginia Orthopaedic Society
Medical Society of Virginia
Medical Society of Northern Virginia
Washington D.C. Orthopaedic Society
Board Member- Anderson Orthopaedic Research Institute
Board Member- Anderson Orthopaedic Postgraduate Medical Foundation

Turk, JP, Hamilton, WG, Garino, JP: The surgical technique of impaction grafting to reconstruct the acetabulum in revision arthroplasty: Video Presentation, AAOS, 2003.

Hamilton, WG, Alavi, R, Garino, JP: Femoral Impaction Grafting: Background, Indications and Surgical Technique. Video Presentation, AAOS, 2001. Judged Award Winner.

Research Grants

1. **Title:** DePuy Delta Ceramax Ceramic-on-Ceramic Acetabular Cup Prosthesis System

Description: As part of a multi-center Investigational Device Exemption (IDE) study, patients prospectively randomized to either an investigational ceramic-on-ceramic or a conventional ceramic-on-polyethylene hip implant bearing surface. A total of 264 subjects at 8 sites will be enrolled. Minimum 2-year outcome data will be evaluated to demonstrate substantial equivalency as part of a Pre-Market Approval (510K) application that will be submitted to the Food and Drug Administration.

William G. Hamilton, M.D., Principal Investigator, Charles A. Engh, Sr., M.D., Sub Investigator, Charles A. Engh, Jr., M.D., Sub Investigator, James P. McAuley, M.D., Sub Investigator, Supatra Sritulanondha, M.P.H, Study Coordinator

Supporting Agency: DePuy, a Johnson and Johnson Company

2. Title: DePuy Delta Ceramax Ceramic-on-Ceramic Acetabular Cup Prosthesis System 36 mm.

Description: As part of a multi-center Investigational Device Exemption (IDE) study, a consecutive series of patients will be implanted with ceramic-on-ceramic THAs that include 36-mm femoral heads. Minimum 2-year outcome data will be evaluated to demonstrate substantial equivalency as part of a Pre-Market Approval (510K) application that will be submitted to the Food and Drug Administration.

William G. Hamilton, M.D., Principal Investigator, Charles A. Engh, Sr., M.D., Sub Investigator, Charles A. Engh, Jr., M.D., Sub Investigator, James P. McAuley, M.D., Former PI, Supatra Sritulanondha, M.P.H, Study Coordinator

Supporting Agency: DePuy, a Johnson and Johnson Company

3. Title: Factor Influencing Outcome After Joint Replacement

Description: This retrospective study will investigate outcome after total joint arthroplasty stratified by patient age. Appropriation for funding was included in 2003 legislation. Contract was signed in August of 2005. IRB approval necessary to initiate the study was obtained in October 2007. Study will continue through April 2010.

Robert H. Hopper, Jr., Ph.D., Principal Investigator, C. Anderson Engh, Jr., M.D., Co PI, William G. Hamilton, M.D., Sub Investigator

Supporting Agency: A cooperative agreement was awarded and administered by the U.S. Army Medical Research & Materiel Command (USAMRMC) and the Telemedicine & Advanced Technology Research Center (TATRC) under Contract Number W81XWH-05-2-0079.

4. Title: A Prospective Comparison of Rotating Platform Cruciate Substituting Total Knee Arthroplasty with Rotating Platform High-Flex Cruciate Substituting Total Knee Arthroplasty

Description: This study will investigate whether there is a significant difference in outcome at 1-year among patients receiving a conventional mobile bearing knee and the same type of component designed to allow increased flexion. Planned enrollment of 142 patients.

William G. Hamilton, M.D., Principal Investigator, C. Anderson Engh, Jr., M.D., Sub Investigator, Supatra Sritulanondha, M.P.H, Study Coordinator

Supporting Agency: DePuy, a Johnson and Johnson Company

Clinical Research in Progress

Prospective, Randomized Comparison of Standard vs. High Flex Rotating Platform TKA:
Enrolling 142 patients in a prospective randomized single blinded study to determine differences in outcome between standard and high flex rotating platform total knee arthroplasties. Implanted 82 of 142 patients to date. Funded by a Grant from Depuy, J&J.

Rapid Detection of Periprosthetic Joint Infections with Real-Time Reverse Transcription Polymerase Chain Reaction Using Ribosomal Ribonucleic Acid.
Collaborative study between the Anderson Orthopaedic Research Institute, George Washington University and the NIH to determine utility of rapid PCR in diagnosis of infected TKA.

Utilization of Isolated Mechanical Thromboembolic Prophylaxis in Total Knee Arthroplasty: Study of 4061 consecutive TKA's utilizing sole mechanical prophylaxis following TKA with 6 week ultrasounds on all patients. Abstract submitted for presentation, manuscript currently in production.

Outcomes of minimally invasive UKA utilizing a single prosthesis: Study of 507 consecutive Preservation UKA's with average 4 year follow up. Abstracts have been submitted and continue in preparation to include: survivorship, learning curve, effect of various factors including obesity on survivorship, utility of arthroscopy to manage the painful UKA.

Continued follow-up of patient cohorts involved in IDE studies for following studies: Delta Ceramic-on-ceramic 28 mm prospective randomized study, Delta Ceramic-on ceramic 36 mm study, Delta ceramic on Ultamet metal vs. metal on metal prospective randomized study
